

Mix and Store

The Green Line Mix Cupboards are designed for paint mixing and storage and meet the requirement for storing of isocyanates according to the Swedish regulations. The cupboard and work bench are ventilated with exhaust at the back of the cupboard, supply air at the front top. Prepared for ex-lightning at the top. Two shelves for storage and one spraygun holder included.

Connections for supply- and exhaust air at the top of the cabinet (fans and piping are not included)
